# Reveal Your Naturally Radiant Skin with SkinPen®

Beautiful skin is within your reach with SkinPen Precision!

This exciting treatment can improve your complexion, reduce wrinkles of the neck, reduce the appearance of acne scars and reveal smooth healthy skin.

## How Does SkinPen work?

SkinPen Precision creates thousands of microscopic channels in your skin. While doing this, it activates the body's natural healing response to remodel the skin and keep the overall structure of the skin intact.

## What Can I Expect at My SkinPen Treatment?

Your physician may apply numbing cream to your skin in order to keep you more comfortable during your treatment. This typically takes 30 minutes to take effect, depending on the treatment area. After your treatment, your skin may appear slightly pink to red, similar to a mild to moderate sunburn.

## Will SkinPen Work for Me?

SkinPen has been clinically shown to be effective for all skin types. With as few as three non-invasive and affordable treatments spaced 30 days apart, you can improve your appearance and step out with confidence.

- 94% of patients noticed an improvement in how their neck wrinkles looked at one-month post treatment.
- 90% of acne scar clinical trial subjects would recommend to friends and family.

**Now offered at our Cary, North Carolina location!**

**Call to schedule a SkinPen appointment today: 919.926.3010**

See intended use, important safety information, and clinical trial details (data on file) at [skinpen.com](http://skinpen.com).

SkinPen® U.S. intended use: The SkinPen® Precision system is a microneedling device and accessories intended to be used as a treatment to improve the appearance of wrinkles of the neck for Fitzpatrick skin types II - IV and to improve the appearance of facial acne scars in adults with all Fitzpatrick skin types aged 22 years and older. Rx only.
