SERVICE MENU

Functional Medical Consultations

Medical consultations with our functionally trained providers are beneficial if you need a deeper dive into specific medical concerns (such as gut health, thyroid, inflammation, etc.) but want to maintain your current primary care provider.

Essential Wellness Consultations (\$600)

Bundle our extensive wellness lab panel with a 90-minute consultation, where one of our functionally trained providers will help tailor a plan toward your specific needs based on your lab results, symptoms, physical exam, and medical and family history.

Essential Hormone Balancing

Treat hormone imbalances with bioidentical hormone replacement therapy (BHRT). BHRT is available in pellets, topical creams, capsules, and injections, and all of our providers are functionally trained in hormone replacement therapy.

Essential IV Therapy

Our custom-made IV protocols deliver important vitamins, antioxidants, and other nutrients directly into your blood stream. Benefits include hydration, increased energy, reduced inflammation, immune support, and healthier skin.

Essential Aesthetics

We offer product and treatment selections designed to make you look and feel your best, including microneedling [stand alone and with platelet-rich plasma treatments (PRP)] and hair restoration with PRP.

Eleon Skin Care

Essential Health's curated medical-grade skin care line, Eleon, provides cleaner, and safer ingredients that are effective and provide medical-grade strength. You can be assured that each Eleon product is gluten-, paraben-, and fragrance-free.

Specialty Lab Testing

We partner with some of the top labs in the country to help provide an extensive look at hormones, cardiac health, thyroid function, food sensitivities and overall health. Some of the specialty labs we use include ZRT, Cleveland Heart, and Vibrant America.
